

Product Requirements Document (PRD)

National Fitness Organization – Instructor Activity & Attendance MVP

Version: 1.0

Prepared for: National Fitness Organization (Regional Branches)

Prepared by: Donald Race

Backend: Supabase Database

Platforms: Mobile App (Instructors), Web Dashboard (Branch Management)

1. Executive Summary

Across the organization's branches nationwide, instructors currently log their class activity, attendance, and time manually. This results in inconsistent data, inaccuracies, missing entries, and incomplete reporting—making it difficult for branch leadership and national leadership to quantify instructor utilization, member engagement, and overall operational value.

This MVP establishes a unified digital system—mobile for instructors and web/mobile for branch managers—to accurately capture, store, and analyze activity and attendance data. It provides immediate operational insight while laying the foundation for national-level scaling.

2. Objectives

Primary Minimal Viable Product (MVP) Goals

1. Replace manual paper-based instructor activity logs with a mobile app.
2. Enable accurate, real-time member attendance recording.
3. Provide branch managers with a centralized dashboard to view instructor activity, member participation, and performance metrics.
4. Capture standardized data across all branches within a shared Supabase environment.
5. Provide exportable reports (Excel & PDF) for operational summaries and presentations.

Success Metrics

- 90% reduction in missing/incorrect class logs
- 50% reduction in instructor administrative time
- Consistent tracking across 100% of participating branches
- Accurate attendance reporting for each class session
- Branch managers able to evaluate instructor utilization and member engagement trends

3. User Personas

3.1 Instructor (Mobile App User)

- Teaches fitness classes at one or multiple branches
- Responsible for logging class sessions and attendance
- Needs quick, easy, on-the-go entry
- NOT responsible for reporting or metrics

Pain Points:

- Manual paperwork, delays, lost forms
- Relying on memory to reconstruct class logs
- Inaccurate rosters

MVP Needs:

- Easy class entry
 - Quick attendance selection from a roster
 - Simple time logging
 - Confirmation that entries were submitted
-

3.2 Branch Manager (Web Portal User)

- Oversees a local branch
- Manages instructors' schedules and performance
- Reviews member participation and engagement
- Ensures data completeness and accuracy

Pain Points:

- No centralized view
- Hard to measure instructor utilization
- No historical member participation data

MVP Needs:

- Dashboard with analytics
 - Ability to verify instructor logs
 - Attendance trends
 - Export-ready reports
-

4. Core MVP Features

4.1 Mobile App (Instructor)

A. Authentication

- Supabase email/password auth
- Instructors may be assigned to **multiple branches**

B. Class Session Logging

Instructors must enter:

- Branch
- Class Type (select)
- Activity Type (select: Instruction, Admin, Travel, Prep, etc.)
- Class Start Time
- Class End Time
- Optional notes

Auto-calculated: Duration (in minutes/hours)

C. Member Attendance

- Selectable roster tied to the branch
- Multi-select list
- Minimum UI friction (fast tap-select approach)

D. Submission Workflow

- Save draft
- Submit session
- View submitted history
- Edit allowed before approval

4.2 Web Portal (Branch Management)

A. Dashboard & Analytics

Branch managers can view:

1. **Instructor Utilization %** - Hours scheduled vs hours completed
2. **Member Participation Rate** - Attendance / membership count
3. **Most Popular Class Types** - Ranking by participation
4. **Time Spent by Activity Type** - Instruction vs admin vs prep vs travel
5. **Branch Performance Comparison** - Compare instructors within branch
6. **Member Retention Trends** - Attendance over time
7. **Instructor Consistency Score** - % of classes logged vs scheduled

B. Class Sessions Management

- List of all instructor logs

National Fitness Organization – Instructor Activity & Attendance MVP

- Filter by instructor, date, class type
 - Ability to approve or request correction
-

C. Member Management

- Member roster (import or manual entry)
 - Attendance history per member
-

D. Reporting & Exporting

Branch managers can export:

- Excel (.xlsx)
- PDF summary reports

Exportable datasets include:

- Instructor hours
 - Attendance lists
 - Class type trends
 - Member retention logs
-

5. Data Model (Supabase)

Tables Included in MVP

1. users

- id
- name
- email
- role (instructor, manager)

2. branches

- id
- region
- branch name

3. instructors_branches (many-to-many)

- instructor_id
- branch_id

4. members

- id
- branch_id
- name
- membership_status
- join_date

5. class_types

- id

National Fitness Organization – Instructor Activity & Attendance MVP

- name

6. session_logs

- id
- instructor_id
- branch_id
- class_type_id
- activity_type
- start_time
- end_time
- duration_minutes
- notes
- status (draft, submitted, approved)

7. attendance

- id
- session_id
- member_id

6. Roles & Permissions

Instructor

- Can log sessions for any branch assigned
- Can view/edit only their own logs
- Cannot view metrics

Branch Manager

- Can view all instructors in branch
- Can approve logs
- Can view analytics
- Can export reports

7. Non-Functional Requirements

- **Scalability:** Must support dozens of branches and thousands of members
- **Reliability:** 99% uptime target with Supabase
- **Performance:** Mobile entry < 2 seconds
- **Security:** Row-level security ensures instructors only access relevant branch data
- **Data Retention:** 7 years minimum (industry standard)

8. User Flows (High-Level)

Instructor Flow

1. Login
2. Select branch

National Fitness Organization – Instructor Activity & Attendance MVP

3. Start new session
4. Select class type & activity type
5. Enter time
6. Select attending members
7. Submit
8. See confirmation

Branch Manager Flow

1. Login
2. View dashboard
3. Filter by date or instructor
4. Review pending session logs
5. Approve or send back
6. Export reports
7. Review attendance metrics

9. MVP Scope

Included

- Instructor mobile app
- Branch manager web dashboard
- Session logging
- Attendance tracking
- Basic analytics dashboard
- Export tools
- Supabase backend
- Member progress tracking (basic metrics only)

Excluded (Future Enhancements)

- National/admin hierarchy
- Payments or billing
- Push notifications
- Offline mode
- Member app / portal
- Instructor scheduling
- Digital waivers
- AI analytics
- Wearable device integration

10. Release Roadmap

Phase 1 (MVP) – 8–12 weeks

- Mobile session logging

National Fitness Organization – Instructor Activity & Attendance MVP

- Attendance tracking
- Supabase backend
- Web dashboard & reporting
- Instructor/Branch permission model

Phase 2 – 6–8 weeks

- Regional dashboards
- Instructor scheduling
- Member progress charts
- Advanced analytics
- Data quality alerts

Phase 3 – 8–12 weeks

- National dashboard
- Push notifications
- Member mobile app
- Branch-to-branch comparisons at scale
- Offline capabilities

11. Additional Industry Insights

Based on comparable fitness/health programs (YMCA, park districts, martial arts centers, corporate wellness):

Recommended Near-Future Features

- **Instructor Attendance Reliability Score** (key KPI)
- **Member Engagement Heatmaps**
- **Automated Weekly Summaries** sent to branch managers
- **Class capacity planning** (predict class popularity)
- **Drop-off alerts** for members whose attendance declines

These will strengthen the case for organizational value at the regional and national level.

Your PRD Is Complete

This PRD is now ready to feed into:

- AI Vibe Coding
- Technical design
- UI wireframing
- Product planning
- Development estimation

If you'd like, I can also generate:

National Fitness Organization – Instructor Activity & Attendance MVP

- 📌 Wireframes for the mobile app
- 📌 Wireframes for the web portal
- 📌 Database schema (SQL for Supabase)
- 📌 Timeline & cost estimate
- 📌 A pitch deck / proposal to present to the national org

Just tell me what you want next.
