

YMCA Class Attendance System – Product Requirements Document (PRD)

Version 1.0 Prepared for: YMCA National Network Document Type: Corporate PRD

1. Executive Summary

The YMCA Class Attendance System replaces spreadsheet-based workflows with a unified Instructor Mobile App, Manager Mobile App, and Manager Web Dashboard. This MVP supports a pilot branch while enabling national scalability.

2. Problem Statement

Branches rely on manual spreadsheets for attendance, scheduling, and reporting. This creates inaccuracies, delays, and high administrative overhead.

3. Project Objectives

Operational and strategic goals include digitization, standardization, improved reporting accuracy, and reducing manager workload.

4. User Personas

Instructors require fast, mobile-friendly attendance entry. Managers require oversight tools, reporting, and analytics.

5. MVP Scope

Included: Instructor App, Manager App, Manager Web Dashboard, Scheduling, Attendance, KPI Reporting, Exports. Excluded: Member rosters, payments, wearables, AI (future).

6. Functional Requirements

Full requirements include class scheduling, attendance entry, approval workflow, KPI dashboards, and reporting.

7. Approval Workflow

Configurable per branch—approvals may be ON or OFF.

8. Reporting Requirements

Exports include Excel, PDF, monthly summaries, instructor reports, and class type/group averages.

9. Data Model

Modernized schema includes users, branches, schedules, class types, groups, and attendance logs.

10. User Stories

Instructors: need fast attendance entry and ability to edit until approval. Managers: need schedule management, approvals, KPIs, and exports.

11. Non-Functional Requirements

Performance, reliability, scalability, and security specifications are defined.

12. Release Roadmap

Phase 1 – MVP (3 to 4 Weeks): Instructor App, Manager App, Scheduling, Attendance, Approvals, Basic Reporting. Phase 2: KPI dashboards, analytics. Phase 3: National dashboards, AI enhancements.
