1. Executive Summary

The YMCA Class Attendance System eliminates spreadsheet workflows and introduces unified mobile and web tools...

2. Problem Statement

YMCA branches rely heavily on manual spreadsheets causing errors, delays, and operational inefficiencies...

3. Project Objectives

Objectives include digitizing attendance, reducing admin burden, improving analytics accuracy...

4. User Personas

Instructors need rapid attendance entry; Managers need scheduling, approvals, and reporting...

5. MVP Scope

Includes: Instructor app, manager app, dashboard, scheduling, attendance, approvals, KPIs, exports...

6. Functional Requirements

Covers class scheduling, attendance entry, manager approvals, KPI dashboards, and export tools...

7. Scheduling Requirements

Managers define time, class type, instructor, group, and recurrence...

8. Attendance Requirements

Headcount-only entry, draft submission, one record per class, approval flow...

9. KPI Requirements

KPIs include monthly totals, averages, trends, and instructor utilization...

10. Reporting Requirements

Exports include PDF and Excel reports, summaries, and attendance detail listings...

11. Data Model

Tables include users, branches, instructors_branches, class_types, class_groups, class_schedule, attendance_logs...

12. User Stories

Instructors need fast entry; Managers need overview, KPIs, and scheduling tools...

13. Non-Functional Requirements

Performance <2 seconds, 99% uptime, secure RLS, scalable...

14. Release Roadmap

Phase 1 (3–4 Weeks): Core apps + scheduling + attendance + approvals + basic reporting...
